

1 Square = 1CM<sup>2</sup>

## Things to consider when doing your line drawing;

- Door measurements and frame measurements.
- Distance from the nearest wall to the frame.
- Window Measurement inc. sill height and distance to the nearest wall.
- Height of the room.
- Current position of the toilet - for waste pipe position.

The grid is for reference. However, please do not feel the need to do an accurate to scale drawing, so long as the above criteria is met, an accurate line drawing can be drawn up by one of our team members.

We hope you find this helpful, if you have any further questions please feel free to get in touch.

Thank you for your enquiry.
